**SPECIAL TRIAL OFFER NO. 44. LARGE TWO-YEAR HARDY MONTHLY BLOOMING ROSES**

In growing roses so we do in immense quantities to meet the demands of our retail and wholesale trade, we generally have a surplus of stock of the best varieties, and from this surplus we will make up our Special Trial Offer No. 44, of Eight Large, Two-Year Monthly Blooming Roses for $1.50, postpaid, or Ten Large Roses for Eighty (80) cts. For $1.50 we will send the ten large express prepaid anywhere in the United States, and with the roses send, if requested, a copy of McGregor's Guide to Floriculture. We recommend this offer to all prospective customers as one of the best we make, and will be found, we think, to give greater value than can be had from any other grower in the United States.
Club orders will be packed in separate light cardboard boxes for convenience in delivering, and all such orders will be shipped in one large box direct to Club raiser, or if requested by Club raiser, orders can be sent separately, direct to all parties.

REMARKS

Plants can be sent at any time of the year—Winter, Spring or Summer—If we send your order the following guarantee applies on it:

GUARANTEE—We guarantee all Trees, Shrubs, Plants, Bulbs and Seeds that we send out to be true to name and to reach purchaser in good condition when forwarded by MAIL, or EXPRESS (freight shipments at purchaser's risk), and hold ourselves in readiness to replace all stock that may accidentally prove untrue to label, free of charge, or refund the amount paid therefor, but it is mutually understood and agreed between the purchaser and ourselves that our guarantee of genuineness shall not in any case make us liable for a greater sum than that originally received for such stock that may prove untrue. Most failures with plants, bulbs and seeds are due to soil conditions, unfavorable weather and other causes entirely beyond our control, rendering it impossible to guarantee success, and although we will take all possible care to send only such stock as will, under proper conditions, give satisfactory results, we do not, and shall not be expected to guarantee stock to grow, or guarantee results in any way, and we can not entertain complaints that are not made promptly after receipt of goods.

METHODS OF PACKING AND FORWARDING ORDERS.

In this catalogue all stock listed (unless noted) CAN BE SENT by mail. There are some items, however, that SHOULD be sent by express, and other items that, on account of size, MUST be sent by express. The packing and shipping therefore is divided into these three methods:

We always use our best judgment in packing and forwarding of all orders, putting them up consistent with safe delivery and future results; and while there are instances where local planting or other conditions make it advisable to have orders sent by express so as to admit of the ball of earth remaining over the roots, still, in a great many instances and to far away points, where transportation charges are high, the soil can be removed from plants of the larger sizes, and too large for mailing packages, and the roots packed in damp moss, and delivery of the plants made at a great saving in transportation charges. We will, therefore, unless otherwise instructed, use our best judgment in executing such orders, believing that at times, and where our customers are not aware of the best methods to use, their orders can be executed more satisfactorily. It should, therefore, be understood that if particular packing and forwarding instructions are to be followed, they should be plainly stated under the above heading "Remarks."
In this catalogue, our new book for spring of 1909, we have included about 6,000 items of new, rare, and unique flowers, plants, seeds, bulbs, and other garden supplies. We are confident that this catalogue which we hope will be found pleasing, comprehensive, and helpful, is entitled to the careful consideration of all buyers and to those who are not yet on our books as customers.

With assurances that all orders and communications shall have our most careful, conscientious and prompt attention, we will not fail to examine all orders promptly.

Important information for correspondents and customers

When you order, please use the printed envelope and order sheet enclosed. Others will be sent upon request. Always write your name the same, adding the postoffice, county and state on each and every communication you send us. If you have occasion to write us, please use a separate sheet.

Orders are promptly filled or our customers advised by postal card. If you do not hear from your order within a reasonable time, please mail us a duplicate of your order, exactly copied, including name, address, and order number. We will acknowledge your order as soon as possible.

Remittance with order. Please send money in the form of a check, postal order, or money order sufficient to cover the entire bill, as it will facilitate the execution of your order. During the busy season, it will be necessary for you to send checks direct, or in the form of a certified check, or it will be necessary to deposit the remittance in the post office, and we will send a receipt for the same.

Guarantee. We guarantee all live plants, trees, shrubs, bulbs, and seeds that we send out to be true to name, and to reach purchaser in good condition when forwarded by mail or express (freight shipments at purchaser's risk), and hold ourselves in readiness to replace all stock that may accidentally arrive damaged, or to give a full or partial refund of the purchase price. If any stock is lost in transit or otherwise, we will not be liable for its replacement.

How to remit. Postoffice orders. The safest and most convenient way of remitting money from one point to another is by means of postoffice orders. These are lost a duplicate can easily be obtained, and there is no danger of their being stolen, for no one can obtain money on them except the person to whom they are addressed. They can be purchased at any postoffice, and not all. The fee is five cents for $5.00 and under.

Loose money. Enclosed in a letter is at the risk of the sender.

Postage stamps. These can be sent for fractional part of one dollar or where postoffice orders cannot be had, provided a two-cent stamp extra is sent with every remittance. None but stamps in perfect order accepted.

Our prices. We guarantee our goods to give satisfaction, and every shipment is sent out under our guarantee of safe delivery at your door.
Our Nursery Department is separate and distinct from our greenhouse, and it is necessary, therefore, that all items selected from this department, and from pages 76 to 81 inclusive, be shipped direct from our Nursery under separate transportation charges. No garden or landscape is complete without trees and large shrubs, and their proper spacing and arrangement should constitute the basis or foundation upon which all other plantings should be made.

Remember that Nursery Stock is field-grown, and to be of satisfactory size for immediate effect cannot be sent by mail. In forwarding Nursery Stock we will use our best judgment as to shipping by express or freight.

Order Nursery Stock Early, as the plants will be in dormant condition, and should be planted before they start into growth.

Suggestions to Planters

Trees and Nursery Stock.

Success depends in a large measure on the treatment given to stock after it is received by the planter. Thousands of well-grown, healthy specimens, delivered in first-class condition, are annually lost through neglect and bad treatment. Avoid all unnecessary treatment of the air. The natural place for the roots of trees is in the ground as soon as received they should be heeled in, so that mellow earth will come in contact with all the roots. When planting, take out but few at a time. An hour's exposure to hot sun or drying wind is sure death to many trees. More particularly is this the case with evergreens; when once dried, no amount of soaking can dilate and restore them to their normal condition.

$3.00 ORders PRepaid by ExpReSS. If we are allowed to remove the soil from the plants, we will send express size plants and prepay the expressage on all orders amounting to $3.00 or more. It must be stated plainly on the face of your order. See methods of shipping plants on back of order sheet.) This prepaid offer does not apply to our Nursery Department.

We have all the principal express companies here—Adams, American, United States, Pacific and Wells Fargo, these connecting with all other express companies, and the lightest possible boxes are used to reduce express charges to a minimum.

Mailing and Light Express Boxes

Special Express Rate for Plants By special arrangement with all express companies, all plants are carried at a reduction, and on account of a graduated scale of rates runs from twenty per cent, to thirty-three and one-third per cent, less than the regular merchandise rate. All stock listed in our Catalogue, unless noted, is offered at prices marked by mail, postpaid, and we deliver all such items free of all expense to any postoffice in the United States.

Correspondence

We invite correspondence on any business topic, and are always glad to give you any information or suggestions on any subject within our knowledge. When writing about plants on an order, write on the order sheet, under the heading "Remarks," what plants you wish and furnish complete information, so that it will not be necessary for us to look up records, as this always causes delays.

Change of Address

If you have changed, or intend to change your address, please let us know, and we will change it on our books so that you will receive our Seed Annual at your new postoffice. If you have rural mail delivery, be sure to give the name and number of your route, if necessary, when ordering.

Our Fall Catalogue

of imported bulbs, plants and seeds for fall planting and winter bloom will be ready about September 1, and sent to all of our patrons this year without request; to others free on application. If not received promptly, a postal card will bring it.

Errors and Complaints

We exercise the utmost care in filling orders, striving to do a little more than we offer, yet in the press of business errors sometimes occur, and when orders are received that are in some way damaged or not satisfactory, we wish to be promptly notified and will make such an adjustment of your claim as will be satisfactory. When you write us, simply give the nature of your complaint, giving a list of the plants damaged and price paid for them, and state whether you wish these items replaced or the amount refunded. It is nearly impossible to find time in the busy season to adjust your complaints promptly unless you give us all the information required to do so in your first letter.

Quality and Service

This testimonial is one of hundreds which we receive every season:

The McGregor Brothers Company, Hendersonville, N. C.

Famous the world over as one of the most magnificent Hardy Crimson Roses ever introduced. It is a strong, vigorous grower, entirely hardy, an early and abundant bloomer, and both buds and flowers are considered models of perfection, and its brilliant, shining crimson color is the standard of color by which other Roses are judged. In fact, it is almost unequalled in beauty of form and brilliant intensity of color. It is not a new variety, but so valuable that it is frequently scarce and difficult to obtain, as almost everyone wants a “General Jack.” This year, however, we believe our stock is ample, and hope to have enough to meet all demands. Price, strong one-year-old plants, own roots, 15 cents each; six for 85 cents; twelve for $1.50; two-year-old, heavy plants, 40 cents each; six for $2.00; twelve for $3.75.

THE QUEEN OF ALL FLOWERS

The Garden Rose

The name is an inspiration to all garden lovers. They are justly classed among the showiest and best plants for decorating the home grounds. No garden complete without them, no arrangements satisfactory that neglect them; in fact, they are indispensable. We endeavor in this catalogue to present the largest variety fairly and faithfully, being cautious not to overpraise—preferring to say too little rather than too much. Recognizing the importance of robust, healthy habit, hardiness and freedom of bloom, combined with beauty of flower, we propagate largely varieties possessing these characteristics, and recommend such kinds for general planting; and we also give due attention to those varieties which are less vigorous and robust, and which therefore require more care to bring them to perfection. In the hands of the Rose lover all kinds amply repay any care bestowed upon them. Our immense stock and great variety of Roses enable us to offer assortments adapted to various purposes; and whenever we can be of any assistance in making selections, our services will be cheerfully given.

We Offer a Grand Collection of

Teas and Hardy Teas (monthly bloomers). Hybrid Perpetuals (Hardy Garden or June Roses). Hardy Climbing Roses.

Polyantha Roses. Wichuriana or Evergreen Roses.

The National Rose of America

The American Beauty

THE GREATEST OF THEM ALL

A hardy Rose of the largest size, having the ever-blooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose, and equally valuable for winter or summer flowering. The flowers are so eagerly sought that they sell in the larger cities during the holiday season at the extravagant price of from $1.50 to $2.00 for a single bud or flower. In color it is a deep, brilliant rosycarmine, shaded towards the center with rich carmine-crimson. The outer petals take the coloring of lighter dull carmine. The American Beauty is one of the most vigorous Roses we have. It makes the heaviest stems and the largest bush, it not being unusual to see a rampant bush with a dozen canes as thick as your finger and several feet in height. The American Beauty is unquestionably the most popular Rose now before the public, a popularity due principally to its splendid value as a winter forcing variety. It should be protected outdoors in the winter. Sold under positive guarantee as to being true to name. (See illustration and prices below.)

Price, one-year-old plants, own roots, 20 cents each, six for $1.00; two-year-old, heavy plants, 35 cents each, six for $1.25, twelve for $3.50; three-year-old, extra heavy bushes, 50 cents each; six for $3.00, twelve for $5.00.

McGregor’s Guide to Floriculture gives valuable information on growing of all kinds of Roses. Remember it is free on request with an order amounting to $2.00.
GRAND NEW HARDY RHEA REID WINNER OVER ALL NEW ROSES

This novelty in Roses is a seedling variety of great distinctness of character. The growth is vigorous, throwing out long shoots with rich green leaves, and each shoot bearing a flower well above the foliage. It is a variety which will produce flowers as large as the American Beauty, as double as the grand Rose Bridesmaid, and as fragrant as the beautiful La France. The buds are long, pear-shaped, and a most beautiful rich crimson, and retain their form for a long time. This variety will certainly prove a most valuable addition to the list of forcing Roses, and will soon be seen in the show windows of cut-flower stores in our large cities. Of all the crimson Roses which have been introduced for years, there is none that has measured up better to the ideal standard than Rhea Reid. Highly recommended. THE FIVE GRAND COCHET ROSES

If you want five of the finest hardy ever-blooming Roses for outdoor cultivation, varieties that will produce hundreds of superb flowers throughout the growing season, order the five COCHET ROSES. No matter where you live, they will give you perfect satisfaction. They are absolutely the best Roses in the world.

FINK MAMAN COCHET (The Queen of all Pink Garden Roses)—Such beauty and exquisite form as is possessed by this variety is well nigh marvelous. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two-and-one-half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Perfectly hardy in all sections of the country. The color is clear- rich pink, changing to silvery-rose. Price, 15 cents each; four for 50 cents; $1.00 per dozen, postpaid. Two-year plants, 30 cents each; four for $1.00; $3.50 per dozen.

WHITE MAMAN COCHET—This most superb variety is identical with its parent Maman Cochet, except in color, which is snowly-white, sometimes faintly tinged with the slightest suggestion of pale blush. With the same freedom of bloom, magnificent form of buds and flowers, and hardiness, it stands at the head of the list as the best white Rose for open-ground culture. It has the vigor of an oak, being hardy everywhere. Price, 15 cents each; four for 50 cents; $1.00 per dozen, postpaid. Two-year plants, 30 cents each; four for $1.00; $3.50 per dozen.

RED MAMAN COCHET (Helen Gould)—Grows in almost any soil or situation, and produces its superb flowers in amazing profusion on long, strong shoots. For vigorous growth and freedom of bloom, better than American Beauty, and without a peer. The flowers are full and perfectly double, the buds beautifully made, long and pointed. Color warm rose-crimson. Hardy everywhere. Price, strong one-year plants, 15 cents each; four for 50 cents; $1.25 per dozen, postpaid. Two-year-old plants, 35 cents each; $3.00 per dozen.

Manteo, N. C., Nov. 17, 1908.

GENTLEMEN—I received the package of flowers in last night’s mail, and found them in excellent condition. I was thoroughly pleased with the excellent plants, as well. They are surely nice, healthy plants. And I thank you very much for the extra one given.

Respectfully,
(Miss) HELEN L.
LARGE SIZE
TWO-YEAR-OLD

Choice Ever-blooming Tea
and Hybrid Tea Roses

THE ROSES in this class are highly valued because of their fine colors and tea fragrance. They will bloom freely from June to November, even the one-year size plants (two-year-old plants will, of course, bloom more). If planted in the spring so that they may become thoroughly established during the summer, and then protected during the winter, they will, with few exceptions, prove hardy.

THE LARGE SIZE plants referred to above are the two-year plants. We also give prices on one-year plants which, however, are not little, weak, forced slips, but the product of years of experience and our improved methods of culturing, which insure the greatest vitality and abundance of bloom.

Our Popular Soupert Collection—Free Bloomers
Queen of all Bedding Roses

**CLOTHILDE SOUPERT**

This grand Rose continues to be one of the best and most beautiful varieties for bedding ever introduced. The flowers are borne in large clusters all over the bush; they are large, perfectly full and double and most deliciously sweet; color beautiful creamy-white, splendidly tinged with amber, deepening at center to a clear bright pink, and sometimes both red and white Roses are borne on the same plant. The bush is a vigorous grower, and begins to bloom almost as soon as planted, and continues loaded with beautiful buds and flowers during the whole season.

**Price, 10 cents each; $1.00 per dozen, postpaid; two-year-old plants, 30 cents each; $2.50 per dozen.**

Yellow Soupert, or Mosella

Is another novelty that has been wanted for some years. Who does not know the beautiful Clothilde Soupert, the splendid bedding Rose. Mosella is a stronger grower, flowers are a little larger than the Clothilde Soupert, but appear the same way in clusters and on single stems: the color is bright red, the flowers are deliciously white on the edges of the petals. It will make a grand bedding plant, and is perfectly hardy. **Price, 15 cents each; $1.35 per dozen, postpaid; two-year-old plants, 35 cents each; $2.75 per dozen.**

---

**White Soupert, or Leoine Osterieth**

We have given this Rose an extended trial, and believe there is no better white Rose grown. The buds are of good size, the flower full and double and deliciously fragrant, pure porcelain-white, with deep center. **Price, 15 cents each; two-year-old plants, 30 cents each; $2.75 per dozen.**

**Red Soupert (Ma Petite Andre)**

A dwarf, bushy grower and immense bloomer; flowers bright red and perfectly double. **10 cents each; $1.00 per dozen postpaid; two-year size, 30 cents, by express; $2.75 per doz.**

---

**The Four Grand HERMOSA ROSES**

**Hardy, Ever-blooming**

**HERMOSA, The Old Favorite**—Everybody knows this famous variety. As hardy as an oak, and always covered with its elegant clear pink blooms; there is not a shade of color of any kind to mar its purity; we doubt if any Rose ever grown will take its place. **Price, 15 cents each; $1.35 per dozen; large two-year-old plants, 30 cents each; $2.75 per dozen.**

**WHITE HERMOSA MARIE LAMBERT**—Pure white. It has been called the White Hermosa, as it resembles Hermosa in form and freedom of bloom, and is quite as valuable; for, though no claim has been made for it as a fancy Rose, its persistence in bloom will make it a very popular white variety for bedding or for pots. This Rose is fast becoming popular, as there is no better white Rose. It is the finest blooming white Rose we offer. **Price, 10 cents each; $1.00 per dozen; large two-year-old plants, 30 cents each; $2.75 per dozen.**

**YELLOW HERMOSA COQUETTE DE LYON**—This is a most charming yellow Tea Rose, a grand grower, has elegant buds, and is so free in flower as to be called the Yellow Hermosa. This is the best blooming pure yellow Rose in our catalogue. We sold of this Rose the last spring 35,000 plants. It is a Rose that will please all. **Price, 10 cents each; $1.00 per dozen; large two-year-old plants, 30 cents each.**

**CRIMSON HERMOSA QUEEN’S SCARLET**—This, without doubt, the very best of all red Roses for bedding. It can be planted anywhere, being very hardy. The flowers are of large size and of a fiery scarlet, a color seldom seen in Roses. Indeed, a bed of this Rose produces a mass of red equal to a bed of Geraniums. It is planted everywhere on account of its color and freedom of bloom; none but this will do it. **Price, 10 cents each; $1.00 per dozen; large two-year-old plants, 25 cents each; $2.55 per dozen.**

**SPECIAL-OFFER No. 120**—The Four Hermosa Roses for 40 cents, postpaid; or the four in large two-year size for 95 cents.

**GRAND COMBINATION OFFER No. 121**—Eight Splendid Roses (all on this page) for a bed to bloom all summer, one-year size, postpaid, 80 cents; two-year size, $2.10.
The Great New German Rose

**Tausendschön Thousand Beauties**

Tausendschön, which in German means Thousand Beauties, is a very appropriate name to give this great novelty. We are free to predict that Thousand Beauties will become the most sensational climbing Rose yet introduced, not barring the great Crimson Rambler. Imagine a Rose producing on the same bush so many different colored flowers that it is impossible to describe or even picture the variations. A single cluster of flowers is a whole bouquet in itself, hence the very fitting name, “Thousand Beauties.” Blooming profusely from the beginning of June until the last of July, the flowers appear in large clusters, ten to fifteen in a cluster, are of splendid size and quite double. The colors run from delicate balsam or tender rose through the intermediate shades of bright rose and carmine, with white, yellow, and various other delicate tints showing. There is no other Rose in cultivation like it. It is a strong grower, with but few thorns, magnificent foliage, a valuable feature in itself, impervious against mildew and absolutely hardy in the open ground anywhere. Wherever shown it has created a veritable sensation, and has been awarded numerous medals. For climbing over porches, bowers, pergolas or trellises, or for single specimens or pyramids, it will please you from the day you plant it. Price, 50 cents each; three for 40 cents; $1.75 per dozen, postpaid; large two-year-old plants, on own roots, 40 cents each; three for $1.00; $3.50 per dozen.

**CHARMING POLYANTHA OR FAIRY ROSES ESPECIALLY ATTRACTION FOR CHILDREN**

These are a lovely and distinct class of Ever-Blooming Roses, highly valued for their dwarf, bushy growth, and medium size double flowers, which are very fragrant and borne in such large clusters that the whole plant seems a sheet of bloom. They are very pretty and desirable for bedding and general planting. Not entirely hardy, but usually stand the winter with protection. Price, one-year plants, 10 cents each; two-year plants, 25 cents each.

**Mignonette**

A lovely Fairy Rose; full, regular flowers, perfectly double and delicately perfumed. Its color is a clear, delicate rose, with a frequent and peculiar intermingling of white.

**Perle d’Or**

Beautiful light yellowish-salmon, deeper in the center, with small white edges. Blooms in clusters, medium size, of fine form and texture.

**Primula Polyantha**

New. A very showy, low-growing little bush, completely covered with cup-shaped flowers, semi-double, which are China-rose at the edges and snow-white in the center. This arrangement of the color reminds one of the Chinese Primrose. A pretty bedding plant.

**SPECIAL OFFER NO. 122** The Four Polyantha or Fairy Roses, one-year plants, for 35 cents; two-year plants, for 55 cents.

THE POPULAR CRIMSON RAMBLER—The plant is of a very vigorous growth, making shoots from eight to ten feet during the season, rendering it a charming pillar Rose. It is also magnificent in bush form; color is the brightest crimson, which remains undimmed to the end. The flowers are produced in great pyramidal panicles, or trusses, each carrying from trinity to forty blooms, the individual flowers measuring about one to one and one-half inches in diameter. The foliage is a bright green and glossy, and contrasts finely with the bright crimson of the flowers. Price, 15 cents each; four for 50 cents; $1.35 per dozen; postpaid; two-year-old plants, 25 cents each; $2.00 per dozen.

YELLOW RAMBLER—The flowers are borne in immense clusters, after the same manner as the Crimson Rambler. The color is a decided yellow. Many Roses which are described as yellow have really only a creamy tinge, but the Yellow Rambler is clear, decided yellow. The flowers are very sweet-scented. Price, 15 cents each; four for 50 cents; $1.35 per dozen, postpaid; large two-year-old plants, 25 cents each; $2.00 per dozen.

SHELL-PINK RAMBLER ROSE LADY GAY—This new variety, a seedling from the popular Crimson Rambler, closely resembles it in habit of growth and general effect. Flowers are of a delicate cherry-pink, which gradually changes to a soft-tinted white. The plant is a strong, vigorous grower, with profuse, glossy, deep green foliage. Price, 15 cents each; four for 50 cents; $1.35 per dozen, postpaid; large two-year-old plants, 25 cents each; $2.00 per dozen.

PINK RAMBLER (Euphrosyne)—What is said of White Rambler applies equally to this except the color of the flowers is pure shiny rose—the petals of the bud being bright, light carmine. Price, 15 cents each; four for 50 cents; $1.35 per dozen, postpaid; large two-year-old plants, 25 cents each; $2.00 per dozen.

THE BEAUTIFUL NEW WHITE RAMBLER (Thalia)—Of German origin, and in habit of growth, foliage, manner of blooming, form of flowers and hardiness identical with Crimson Rambler. Flowers are pure snow-white and sweetly scented. Price, 15 cents each; four for 50 cents; $1.35 per dozen; postpaid; strong two-year-old plants, 30 cents each; three for 85 cents; $2.25 per dozen, postpaid.

DOORTHY PERKINS—Beautiful shell-pink. A rapid grower, frequently developing shoots from ten to fifteen feet long in one season. Hardy, withstanding the severest winters without injury. Blooms in clusters like Crimson Rambler, but the flowers are more double and large. Price, 15 cents each; four for 50 cents; $1.35 per dozen, postpaid; large two-year-old plants, 25 cents each; $2.00 per dozen.

The Six Most Popular Creeping and Trailing
Hardy Memorial or Evergreen Roses

Especially Recommended for Cemetery Planting

Sometimes called the *Wichuraiana* Roses, but appropriately classed as “Memorials,” because everywhere acknowledged to be the most suitable and satisfactory Roses one can get for cemetery planting. They will climb when trained, or if left alone they creep along the ground as closely as an Ivy and make a dense mat of shiny, dark green foliage. The leaves are of leathery texture, practically insect proof, and remain green on the plants nearly all winter. They bloom in profusion during June and July, and the single ones bear red berries in the autumn. A growth of ten feet in a season is not unusual, and all are entirely hardy, and when once planted take care of themselves. They are excellent for training over graves or over rough ground, rocks or stumps. Some prefer them to the Hardy Climbing Roses for covering arbors, fences, archways, etc., because their foliage is so attractive and stays green till midwinter. (See prices below.)

**The Beautiful Memorial Rose. Rosa Wichuraiana**

The flowers, which are borne very profusely during July, are large, pure white, single, with yellow center, and have a strong, Wild Rose fragrance. It is one of the very best plants for rock work, embankments, slopes, cemeteries, etc. **Price, 10 cents each; $1.00 per dozen; two-year-old plants, 25 cents each; $2.50 per dozen.**

**Manda’s Triumph**

The gem of all the collection and may well be called the Double Memorial Rose. Very large, double flowers, fully two inches across, pure white, finely formed and sweetly fragrant, borne in large clusters. **Price, 10 cents each; $1.00 per dozen; two-year-old plants, 25 cents each; $2.50 per dozen.**

**Pink Roamer**

Its beautiful flowers are single, very large, brilliant, rich pink with prominent orange-red stamens, and delightfully sweet scented. **Price, 10 cents each; $1.00 per dozen; two-year-old plants, 25 cents each; $2.50 per dozen.**

**Wm. C. Egan**

Large flowers; color a beautiful shade of rose. **Price, 15 cents each; $1.50 per dozen, postpaid; two-year-old plants, 30 cents each; $3.00 per dozen.**

**SPECIAL OFFER No. 136—The Six Hardy Memorial Evergreen Roses, one-year-old size for 50 cents, postpaid. The Six in two-year-old plants for $1.35, postpaid.**

The Best Red Bedding Rose of a Century
PRODUCES A CONTINUOUS MASS OF BLOOM

**BABY RAMBLER**

(Madame Norbert Levavasseur)

Dwarf, Hardy, Perpetual-Flowering Crimson Rambler

The descriptive name of this extremely valuable new Rose, "Dwarf Crimson Rambler," seems a misnomer, yet nothing is more appropriate, for the fame of "Crimson Rambler" properly belongs to it. It forms compact bushes about two feet high when fully grown, and is fully covered with clusters of its rich crimson-red flowers throughout the season. It begins to bloom when in small pots and is practically never out of bloom for the balance of the season. **Perfectly hardy,** it requires no winter care, and should improve each year with good culture. The coloring is brighter and more persistent than in its parent, the “Crimson Rambler,” of which it is a seedling. The size of the clusters and the number of flowers in each are the marvel of all beholders. Its use is varied so as to render it invaluable. As a bedding variety, to make a low, attractive hedge, to border a walk, for planting in cemeteries, or for growing in pots in the house, it stands alone and must find its way everywhere. Remember it is **hardy** and perpetual flowering. **Price, 15 cents each; two for 25 cents; $1.00 per dozen, postpaid; two-year-old plants, 35 cents each; three for 90 cents; $2.50 per dozen.**
HYBRID PERPETUAL ROSES

These are the tall-growing, superb June Roses, with a profusion of large, bright-colored and highly scented flowers during that month. If cut back judiciously when these flowers fade, successive stems of good flowers will follow at intervals all summer. They require rich soil, full sun and good cultivation in order to produce the grand flowers, with sturdy four to five foot stems that Rose-lovers exalt over. Light pruning gives more and smaller flowers on shorter stems. All are very hardy and vigorous, requiring protection only in very cold climates.

Beautiful Pink Hybrid Perpetual Garden Rose, **CLIO** (See photographic illustration below.)

We have in this variety probably the most beautiful hardy Rose grown. It was raised by Wm. Paul & Sons, the celebrated English Rose growers, and awarded two first-class certificates by the Royal Horticultural Society. Flowers very large, color flesh, shaded in center to rosy-pink. Its perfect hardiness, vigorous growth and freedom of bloom make it most valuable for planting in the Rose garden, while the large size, exquisite color and delicious fragrance of its flowers—which at perfection are as large as Peonies—make it desirable as a cut-flower Rose. **Price, strong one-year-old plants, own roots, 20 cents each; three for 50 cents; six, for $1.00; $1.75 per dozen; two-year-old, heavy plants, 40 cents each; six for $2.00; $3.75 per dozen.**

IT IS BEST TO PROTECT ALL ROSES

Although we try to carefully explain in the introduction to each family or class whether the Roses in that class are hardy or not, the safest way is to protect all your Roses, for it will do no harm to the hardest, and where manure is used as a covering it also serves the purpose as a fertilizer.

After the leaves have fallen give the beds a covering of manure, straw, cedar boughs, corn fodder, leaves or street sweepings, enough to keep the roots from freezing but still not to smother the plants. In very cold localities it sometimes pays to wrap the entire bushes in straw or bend them down to the ground and fasten them to stakes driven for the purpose; or cover with boards, as the principal object is to keep the plants dry and from the freezing and thawing at times of storms and sleet and rain. But the matter of protection is not such a serious problem these days when good new Rose plants can be obtained at a very low price. Many people feel that the blossoms produced the first season are worth many times the cost of the plants, and so buy new ones each year.

INSECTICIDES, FUNGICIDES, FERTILIZERS AND GARDEN REQUISITES

Insects may be divided into two classes. First, the chewing, gnawing and biting insects; and second, sucking insects. Those of the first class eat the foliage or fruits, or gnaw off the stems and flowers of the plant. Whether they are bugs, worms, caterpillars or slugs, they are best destroyed by some poison applied on the surface of their food plants, as Paris Green or Hellebore. If for any reason it is not deemed safe to use these poisons, Pyrethrum (Persian Insect Powder) or Tobacco Dust should be used.

For those insects classed under the sucking insects, such as the red spider, the mealy bug, etc., insecticides are required. Saturate the leaves and stems of the plant with the poison. An examination of the leaves and stems of the affected plant will reveal the nature of the insect or insecticide which should be used to treat the afflicted plant. Insecticides and fungicides should be applied to the leaves and stems of the plant immediately before the insects mature enough to spread over the leaves and stems. This is the most effective time to apply the insecticides and fungicides. It is advisable to use a spray which is non-poisonous to the plant and will not injure the leaves or stems.

Begonia Rex  
King of the Begonias

We make a specialty of this marvelous family of plants and offer a collection of the finest varieties, including new and rare kinds that cannot be had elsewhere. They require light soil composed of rich loam, loose woods earth and sharp sand. They like a moist, warm atmosphere, and should be kept shaded during the summer. Do not allow the sun to strike the leaves when wet, or do not over-water. Be sure to try a few of these wonderful plants.

Speculata  Quite a novelty in the Rex type. Leaves are in the form of a grape leaf. Color is a bright green, with a background of chocolate; veins of a light sea-green, the whole leaf spotted with silver. The individual 'pink blooms are lifted high and spray-like quite clear of the foliage. Price, 10 cents each; three for 25 cents.

Duchess De Brabant  This fine variety is very distinct, having a dark greenish-brown center, with a broad silver band enclosed with a dark green edging. The edge of the leaf is smooth and very pointed. Price, 20 cents each; three for 50 cents.

Lord Palmerston  One of the best and easiest to grow of all the Rex Begonias. The leaves are large extra with a dark bronze center, silver bordered and irregular bronze border, blotched and specked into the silver. Price, 20 cents each; three for 50 cents.

Mme. Treve  Very highly colored, especially when the light shines through the leaf, which makes it a bright red. The star-shaped center and the narrow border of the leaf is a reddish-green dotted with silver spots, and the balance silverly-white. Price, 20 cents each; three for 50 cents.

Magnifica  This beautiful variety is quite different from any variety we catalogue. The leaves grow to an immense size, color a rich dark chocolate-brown tinted with dark green. This variety is one of the darkest of all the Rex family. Price, 20 cents each; three for 50 cents.

King of Rex  One of the most effective of its class, though the oldest variety, Of a beautiful metallic luster, center and edge a soft velvety-green, with a broad silver zone terminating at the point. It is of the very easiest culture. Price, 15 cents each; three for 40 cents.

Roi Ferd Major  Extra large leaf of fine silver, small dark starry center, and edge embroidered in the same dark shade. Extra fine. Price, 15 cents each; three for 40 cents.

Ruth Findlay  A very short, bushy-growing variety. The most part of the leaf is a silver color streaked with dark green on the edges. A very pointed leaf with a hairy growth on the edges. Price, 15 cents each; three for 40 cents.

Lesoudsi  This is the finest and largest of any of the Rex family. It is impossible to describe in words the beautiful markings of this magnificent Begonia. It is a cross between Begonia Diadema and a Rex variety, but retains in a marked degree the Rex character. Price, 15 cents each; three for 40 cents.

Rubrum  The entire leaf has a purplish metallic luster, which makes it one of the most attractive varieties. The leaf is very large, with a smooth edge, and the plant is a vigorous grower. Price, 15 cents each; three for 40 cents.

Bertha McGregor  This new Begonia is known to be and acknowledged by all the leading Begonia growers of the United States to be the best all round Begonia in the Rex family. Chrysanthemums are of Japanese and Chinese origin, and are by far the most gorgeous and elegant of our fall blooming plants. Through the enterprise of American growers, who have given them time and devotion, they have, as if by magic, so developed as to give them the unqualified title of "Queen of Autumn Flowers." For massive blooms, grandeur of color, elegance of culture and grandeur to flower, either in the open ground or in pots, there are no plants that will surpass them, and but few their equal. The season of bloom lasts up until severe frosts. It is a pleasing thought to anyone who may have poor success with flowers to know, whether other plants bloom or not, the Chrysanthemum will put forth some sort of a flower if the plant is only a few inches high. The endeavor of nearly all growers has been, in late years, to introduce varieties which will produce the largest and finest blooms for exhibition purposes, and it is of these varieties that our list is made up. Every sort we offer, if well grown, should prove a prize winner.

Chrysanthemum Novelties

Golden Eagle
A new variety which will prove one of the most valuable yellow Chrysanthemums ever introduced. It will prove as great a favorite as the grand yellow Major Bonafon. This sort has been fairly tested this year, and at the Chrysanthemum shows the large vases of it are attracting unusual attention. The color is a deep yellow, flower of compact, incurved form, with a strong stem holding the flower quite erect. The foliage grows well up to the flower. This variety was awarded the special stake prize at the Chicago Chrysanthemum Show. Price, 35 each, three for $1.00, $3.00 per dozen, postpaid.

Lynwood Hall
A glorious new Chrysanthemum, glistening snow-white, of the largest size, perfectly incurved, of elegant finish, and with stiff stems and beautiful foliage. Was awarded first prize over all competitors at the New York show. Its fine color and size will make it a remarkable commercial sort. This variety is heartily recommended. Price, 25 cents each, five for $1.00, $2.25 per dozen, postpaid.

Miss Clay Frick
This is a white sport from the grand prize-winning variety, Wm. Duckham. The flowers are incurred with bright petals, very heavy and hold up by strong stems with good foliage. Price, 20c each, six for $1.00, $1.75 per dozen, postpaid.

Growing Chrysanthemums in the Yard and Garden

The Chrysanthemum is of easy culture, but to secure fine blooms and strong plants, with healthy foliage, certain rules must not be lost sight of, and care and attention while the plants are growing must be given. There is probably no plant cultivated for its flowers, which is capable of greater possibilities, and year after year the blooms are becoming finer, better in color, size, form and in every way, showing that the time and study which is being given to them is not in vain.

Fine Perpetual Blooming . . CARNATIONS

The Carnation is among the most popular of flowering plants. Its most beautiful flowers, with their delicate fragrance, make it a very desirable plant for everyone. If grown indoors it should be kept in a cool room, given plenty of light, and its soil not so light as to become water-soaked. If planted out of doors, keep soil well stirred, and cut the plants back as they make flower stems, so as to make them short and bushy. Take up the plants about the first of September, and put them ready for winter flowering. See to it that there is plenty of drainage in the bottom of the pot and let the first watering be a good one. Keep them well shaded for a few days, and bring them to the light gradually. The plants we offer on this page are young plants from two-inch pots. Planted out in Spring they should begin blooming about July or earlier.

Gorgeous Flowering Cannas

Bronze, Green-Leaved and Orchid Flowering.

THE BEST VARIETIES OF RECENT INTRODUCTION.

For glaring, gorgeous color, grand foliage and profusion of bloom there is nothing equal to Cannas. They are easily grown, attaining large size in ordinary soil. For summer blooming they are unequalled and very hardy. Plant after all danger of frost is past, and take up again when the tops are killed by frost, and store away in a cool, dark place. Height when full grown is indicated after each variety.

THE GRAND BRONZE LEAVED CANNA “WILLIAM SAUNDERS”—(4 ft.) It is a cross between the famous bronze leaved “Brandywine” and “Mount Etna.” In dedicating it to Dr. Wm. Saunders, of Ottawa, Mr. Wintzer, the originator says of it: “Of the many thousands of hybridized seedlings produced by me, none approach nearer to the ideal of my aim, which is this peerless variety.” The flowers are bright scarlet, produced in great clusters often a foot across and each on branching stems about four feet high. Individual flowers, often five inches across, of remarkable substance and durability. It is a strong, vigorous grower and self cleaning, which also means fresh flowers every morning from June till frost. Price, strong plants, 40 cents each, postpaid; three for $1.25; $4.50 per dozen.

It has a vigorous constitution, blooms early and continuously in the greatest profusion during the whole growing season. Its foliage is white, very large and handsome, and so thick and leathery it is not often injured by rain or wind. It is a strong-growing variety, and will produce from fifteen to twenty flower stalks in a season. Its great masses of snowy-white blossoms contrast finely with the splendid crimson and pink varieties, making the most gorgeous and showy flower beds for the lawn or garden it is possible to have. Price, strong plants, 25 cents each, postpaid; three for 65 cents; $2.50 per dozen. See also combination offer below.

The Beautiful Moss Fern, Seglaginella Emilliana

A new, upright-growing moss, with numerous feathery stems branching from the base and forming a dense tuft. Well grown plants attain twelve to eighteen inches in height. We know of no moss superior to it. We put this moss in with the page of Ferns as the character is very much like the Ferns and is used with them in ferneries. **Price**, 10 cents each; $1.00 per dozen.

**Pteris Tremula**

(Shaking Fern.) The foliage of the Pteris varieties is large, very graceful. The slightest movement of the air shakes the leaves of this kind, which we recommend more for other than house culture, etc. It grows readily and very fast. Keep the leaves from dust and sprinkle slightly every warm day. **Price**, 10 cents each; $1.00 per dozen; large size, 25 cents each.

**Onychium Japonicum**

A very beautiful Fern, having long, graceful fronds. The wiry texture of the leaf makes it keep a long time; very useful to cut for vases, etc. **Price**, 10 cents each; $1.00 per dozen; large size, 25 cents.

The Beautiful Silver Fern, Pteris Argyrea

A very showy Fern, with variegated foliage; fronds large, light green, with broad band of silver-white down the center of each. Very distinct. We have a large stock of this beautiful Fern. **Price**, 15 cents each; $1.50 per dozen.

**Pteris Wimsetti** (Crested Fern)

A very pretty and useful Fern for specimen or dish. Green leaves with the ends very peculiarly crested. This Fern is not generally known. It is one of our best varieties for dishes; being a short, compact grower and will stand rough treatment. **Price**, 15 cents each; $1.00 per dozen; large, strong plants, 25 cents each.

**Aspidium Tsussimense**

Without question the most valuable of all Ferns yet introduced for Fern dishes; of strong but dwarf and graceful habit; of good color and of better keeping quality than any other Fern we know. A clear, good grower and very ornamental. **Price**, 10 cents each; $1.00 per dozen.

**Pteris Cretica Albo-Lineata**

A pretty and useful variegated variety, distinctly showing the clear white variation. A useful and easily grown Fern. **Price**, 10 cents each; $1.00 per dozen; two for 25 cents.

**Davallia Stricta**

A beautiful, strong-grown dwarf Fern, with light green, delicate fronds. It is an easy variety to grow, and an exceptionally fine one for specimen plants or for a dish. **Price**, 10 cents each; $1.00 per dozen.

**SPECIAL OFFER No. 177. One each of the above eight Ferns, making a fine assortment for a Fern dish; plants of the smaller size, 90 cents value for 65 cents, postpaid.**

**Nephrolepis Cordata Compacta**

In our estimation this variety is the finest of all the Sword Ferns: it is of free, strong-growing, compact habit, attaining when fully grown a height of about two feet. The fronds are of a dark green color, very rich, of upright growth, with just sufficient arch in them to make them graceful. For house culture or for window gardening, we do not know of any other variety that would give the same satisfaction and which we could recommend so highly. **Price**, 50 cents each.

**Grand Japanese Fern Balls**

These pretty Japanese Fern Balls are made in Japan from a special variety of Mountain Fern roots, and moss, and are so constructed as to send out beautiful emerald green fronds from every point until covered all over, and is beyond question the most unique and beautiful of all decorative plants; it is much easier grown than a Palm, and more beautiful, requires no potting or soil, anyone can grow it successfully.

**DIRECTIONS FOR STARTING.** Soak the ball in tepid water for a half hour, then hang up, repeat every other day until growth is started, after which sprinkle occasionally as required. It needs practically nothing except the proper temperature—which is that of an ordinary living-room—and sufficient water to keep it in proper condition; they may be allowed to dry up at any time when desired, set away and start up again by watering as before.

**JAPANESE FERN BALLS.** 7 to 9 inches in diameter. **Price**, 65 cents; two for $1.00, postpaid.

**JAPANESE FERN BALLS.** 5 inches and up. **Price**, 40 cents; two for 75 cents, postpaid.

The Beautiful Gold Fern of Australia

*(Gymnograma Alstonii)*

This exceedingly novel and beautiful variety bears leaves of a dark green on the upper surfaces, while the under surfaces are richly covered with a deep golden, farinose powder. It is a most striking plant when viewed from beneath, while from above the unfurling young fronds show the rich golden color. Be careful to avoid watering the foliage of this Fern, set the plant in water instead of watering on top. This is quite important in growing this variety. **Price, 20 cents each; three for 50 cents.**

Cystodium Falcatum

We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is coarser than the Tremula Fern, yet it is very graceful and is becoming very popular. The leaf is a rich, glossy green, and each leaflet is about the shape and size of a rose leaf. The fronds are fine for cutting on account of their lasting quality. **Price, 15 cents each; $1.50 per dozen.**

Adiantum Venosum, (Maiden Hair Fern)

A very beautiful form of A. Cuneatum, having long, graceful fronds, with the ends of the fronds developed into bunching tasseled heads. Very similar to the Cystodium Grandiceps, only having a little larger leaf, and stronger grower. **Price, 10 cents each; three for 25 cents; large plants, 25 cents each.**

Pteris Cretica Mayii

A crested form of Pteris Cretica Alboinaeta, showing same variegations as that variety, but of dwarfed habit. **Price, 15 cents each; $1.50 per dozen.**

Pteris Victoria

A very pretty variegated leaved variety, compact, strong grower and one of the best for Fern dishes. **Price, 15 cents each; $1.50 per dozen.**

**SPECIAL OFFER No. 178**

New Emerald Feather Asparagus, (Asparagus Sprengerii)

It is especially valuable for pots, vases, baskets, etc., covering all with its beautiful sprays of lovely green feathery foliage, which can be cut freely and is very useful for wreaths, bouquets, and all kinds of floral decorations, It makes a charming ornamental plant for the window or conservatory in winter, and is equally valuable for vases, baskets, porch-boxes in summer. It is a strong, vigorous plant, very easily grown, requires but little care and keeps growing, fresh and green, year after year. **Price, 15, 20 and 25 cents each; $1.50, $2.00 and $2.50 per dozen, postpaid.**

A finer and more delicate plant than the Sprengerii, but hardy and easily grown; very satisfactory for window and house culture: extremely graceful window climber, bright green feathery foliage as fine as the finest silk or lace. The fronds retain their freshness for weeks when cut and are greatly admired for floral decoration. OUR IMPROVED LILY OF THE VALLEY

Increases Rapidly, Grand for Permanent Planting

Too well known to need any special description. Everyone knows their value for outdoor blooming, but all do not realize that their sprays of fairy bells can be obtained in winter just as easily. If you wish them for Easter—start them in February. We can supply them all winter. Price, 5 cents each; 50 cents per dozen; $3.00 per hundred.

Ismene Calathina
(Pancratium)

A grand summer-flowering bulb, producing throughout the season large, Amaryllis-like, pure white-fragrant blossoms. Keep the bulbs in a dry, warm place, and plant out in June. Bulbs can be taken up in October, and after a few weeks' rest, potted and flowered in the house in winter, or kept over for planting out another season. Price, 20c each; 3 for 50c.

Hyacinthus Candidans

This is unlike our spring-blooming Hyacinths. Its leaves are deep green, glossy, resembling some of the Yuccas. The flowers are white, in handsome, pendulous bells, arranged on pyramidal spikes, often reaching the height of five feet or more in strong plants. A strong bulb will give from two to three flower spikes and these produce from thirty to fifty flowers. The plants come into bloom in July and bloom constantly until October. Price, 10 cents each; three for 25 cents; $1.00 per dozen.

Tigridias
(Tiger, or Shell Flower)

Our Improved Lily of the Valley

These gorgeous summer-flowering bulbs look well associated with Gladioli, Lilies and kindred stock; grow about two and a half feet high, and flower freely throughout the summer. They require the same treatment as Gladioli, and should be lifted in the autumn and dried off in the same way. (See cut.)

T. CONSPIRATA—Golden-yellow, spotted crimson. Price of any of the above three Tigridias, 8 cents each; the three for 20 cents.

McGREGOR'S SINGLE, DOUBLE, FRINGED AND CRESTED TUBEROUS ROOTED BEGONIAS

These novelties in grand bedding Begonias are fully described on page 64 and illustrated on colored insert.

SPEKEKELIA FORMOSISSIMA

The Gorgeous Scarlet Mexican Lily (Grown in Water)

Any description would be inadequate to give a correct idea of the superb brilliancy of the flowers of this Lily. They are a dark velvety-scarlet, shading to maroon and having a satiny-white stripe in the center of each petal. In form more graceful than any Lily we know of. They must be seen to get a proper idea of their gorgeous magnificence. Plant the bulbs either in sand and pebbles covered with water, like a Sacred Lily, or in pots filled with good, rich soil. If planted in the same manner as the Chinese Sacred Lily, the blooms will appear much sooner, but will not last as long as when planted in earth. Try two or three of these bulbs planted together. Price, 15 cents each; two for 25 cents; $1.25 per dozen, by express.

Our Leaflet on Summer Flowering Bulbs and their Cultivation will be Sent Free on Application with Your Order.
Dwarf Calla

"Gem."

The foliage is of a lustrous dark green, is produced in great abundance; its flowers are produced in the greatest profusion, being literally an ever-blooming variety. Price, 15 cents each; two for 25 cents; $1.25 per dozen.

White Calla

Caladium Ethiopica, or Lily of the Nile. Large, pure white flower; too well known to need description. Price, 10 and 20 cents each; $1.00 and $2.00 per dozen; extra large bulbs 35 cents each.

McGregor’s Brilliant Dahlias

ALL VARIETIES, NEW AND RARE COLORINGS

The Dahlias are well known and much admired plants growing from tender tubers and adapted to bedding in sum- mer. The flowers have a wide range of color, mostly scarlet, orange, yellow, crimson and various shades of other colors. The most suitable soil for the Dahlia is a rough, rich loam, to which has been added plenty of manure and some sand, and spaded into a good depth. Plenty of water is required to keep them in good shape and to produce good bloom, and during a very dry summer the watering must not be neglected. When the frost kills the stalks in the fall, take up the tubers and store in a dry place, covering with a dry earth to prevent them from starting.

Price for any one variety of Dahlias on this page, strong roots, 20 cents each; six for $1.10; $2.00 per dozen, post- paid. By express, price, any variety on this page, 15 cents each, $1.75 per dozen.

HARDY GARDEN LILIES

The beauty of the Lilies appeals to everyone. A really beautiful garden without them is unimaginable; they are needed in quantity and variety to complete it, against evergreens, in groups or lines in the shrubbery, or borders, wherever a scene, stately, faultless beauty of form is required. We have listed only that every good garden really needs. Their culture is simple. Give them good, well-drained soil, with no fresh manures in it, a cushion of sharp sand about their roots and a mulch. In winter, with no disturbance of the roots for at least several years. Planted in groups of three to six or more of a kind the effect is much better than when planted singly. Plant at least 8 inches deep, unless the bulbs are very small, for Lilies as a rule are not set deep enough and therefore fail in a few seasons. (Protect all Lilies in winter.)

Lilium Candidum

Annunciation or Madonna Lily—This is one of the most popular of garden Lilies. The flowers are pure snow-white and very fragrant, borne on long stems. They may remain undisturbed for years and thrive well. Price, 18c each; three for 40c; $1.50 per dozen.

Lilium Speciosum Rubrum
or Roseum

Lilium Tigrinum Flore Pleno

Double Tiger Lily—This is a plant of stately habits, growing from four to six feet high, bearing an immense number of double bright orange-red flowers spotted with black. Price, 15 cents each, three for 50 cents; $1.50 per dozen.

Lilium Harrisii

Bermuda Easter Lily—The flowers of this magnificent Lily are trumpet-shaped, pure white, gracefully formed and delightfully fragrant. Fairy Lilies—Zephyranthes

Beautiful dwarf bulbous plants, very effective for masses or borders, flowering with great profusion during summer. Are most suitable for cool climate. ALBA. Pure white. Our Colored Plate Collections

McGregor’s Imported, Fringed and Crested Tuberous-Rooted Begonias

This charming class of Begonias is perhaps the handsomest of all summer-flowering tuberous rooted plants, and are deserving of much greater popularity. Either as bedding plants or grown in pots, their varied colorings are unique, vivid and gorgeous. Flowers of the largest tums are of immense size and great substance. From the first opening flower until frost arrives, they are a brilliant setting for any garden. The bulbs we offer are grown by an eminent European bulb specialist, and are all first size blooming tubers, true to colors and markings, and we guarantee that our customers will be fully satisfied with the results from plantings.

They thrive best outdoors in partial shade. Solid beds of ribbon borders are very effective ways for planting. Improvements made in recent years in size, texture and colorings are really phenomenal, producing flowers frequently measuring from four and one-half to six inches across, and colors ranging from the purest white and the most delicate tint of pink, yellow and orange, to the most intense scarlet and richest crimson, while the double-flowering and new crested varieties are perfect, full and double to the center. Not since the Tuberous Rooted Begonias were introduced have novelties of such merit in Begonias been disseminated as the new fringed and crested sorts. A general description would hardly do them justice. They must be seen in flower to be appreciated. They are of the finest types, the petals being heavily fringed on the edges and centers heavily crested.

The culture of Tuberous Rooted Begonias is the simplest. They delight in a rich, mellow, welldrained soil, where they can be liberally supplied with water after they have started into growth, but do best where the pots are set in a cold frame where they will be shaded from the direct rays of the sun during the hottest hours of the day. They succeed equally well grown as pot plants for the conservatory or window box. Of the special sorts that are for cold weather, the tubers should be taken up, and after drying, stored away in dry sand or similar material, in a cool place, free from frost until spring.

Price, grand collection per colored plate, one each of six colors, postpaid.
Price, separate colors, your selection, 20 cents each; any three for 60 cents; $1.25 per dozen, postpaid.

McGregor’s Superb Double Flowering Hollyhocks

The Hollyhocks are among the most stately of our garden plants. The colorings vary from shade from pure white to the darkest red, and are easily the most attractive feature of a garden of flowers. They make the most attractive spots in a hardy garden, and a clump or line give an effect not obtainable with any other plant. For planting among shrubbery or forming a background for other flowers, they are without equal. The double sorts form perfect rosettes of the most lovely shades of color. They do best in a rich, deep, well-drained soil, and will repay in quantity and elegance of bloom any special care given them. Careful protection should be given the plants through the winter so that water may not stand around them in any way, and freeze out the roots. We offer

Price, collection per colored plate, one-year plants, one each six colors, for 60 cents, postpaid. Same in two-year plants, for $1.00, by express.
Price, for separate colors, your selection, 15 cents each; any three for 40 cents; $1.50 per dozen, postpaid. Same strong two-year plants, separate colors, your selection 20 cents each; $2.25 per dozen, by express.

McGregor’s Mammoth Flowering Butterfly Pansies

There is no flower more beloved, admired and even adored, than the pansy; no flower border, no cottage garden, but will be beautified by a mass of pansies. The colorings—striped, spotted, bordered and fringed; in rainbow colors, with rich, velvety textures; some light yellow with deep violet spots, the upper petals carmine, edged with white; yellow with crimson-maroon spots and blue rims; deep blue with yellow center, edged black; violet with white center and carmine edges; brown and golden-bronze; jet black; ultramarine blue; pure white, intense yellow. Its culture is not at all difficult and may successfully be attempted by anyone inexperienced in horticultural affairs. Pansy plants planted in the spring as soon as the frost is out of the ground will begin to bloom at once, and afford daily pleasure for a month before Coleus or Oenranthus could be even planted. If snow should fall after planting they would not be hurt. In fact, to get the best results from Pansies, they should be planted just as early as they can be. To get best results and extra large flowers, the soil must be extremely rich—we use equal parts of well-rotted manure and soil. Price, 40 cents per dozen; $1.00 per hundred, postpaid; $2.25 per hundred by express.

The horticultural centers of Europe for many years. Some are very useful for screens, some for hedges, rockeries, steep banks and terraces, others for bedding, edging and bordering and cemetery planting; then again others are fine for cutting to be used as table decorations. Cultivation is of the simplest, beginning with any good garden soil for a foundation, which may be enriched with any good fertilizer, such as well decomposed manure, which will make them as popular in the United States as they have been in the past. The weather sets in, keeping the ground well stirred, and where it is not convenient to water the beds during hot, dry weather, a mulch of any loose material which will keep the soil from baking will be found beneficial.

**Hardy Phlox**

This notable family of hardy perennials is perhaps the most widely known and popular of all the various plants which we have in our gardens, and each year finds the newer and showier varieties increasing through the hybridizer’s skill. Certainly no perennial is more worthy of culture, more satisfactory in every situation, or more effective, planted individually or in groups. All Phlox are well adapted for cutting and are exceedingly floriferous. The plants bloom in midsummer and the gardens can be kept all summer from June until frost. All colors in shades delicate and rich, with flowers ringed, eyed and shaded. They succeed in good garden soil, but are greatly improved by being liberally manured. When in flower they should be watered freely. Phlox usually flower in July and August, and in order to render them autumn-flowering it is necessary to pinch the shoots about the first of July. Plants will then flower in September. For early flowers, leave the plants unpinned. The best time to plant Phlox is in the autumn. The strong plants we offer will flower freely next season.

**Newest Phlox**

The following varieties, 15 cents each; three for 40 cents; six for 75 cents; $1.25 per dozen.

**R. P. STRUTHERS**—In our estimation the very best Phlox grown today—it has no faults. Color clear cherry-red, suffused with salmon shades; deep red eye; fine large truss. The color is so clear and clean that each individual flower stands out as distinct as a cameo.

**ATHIS**—One of the finest varieties yet introduced; color salmon-rose, with large, carmine eye; very attractive and large.

**PRIME MINISTER**—Rosy-white; fine crimson eye.

IRIS

("Fleur De Lis") The National Flower of France

Sometimes known as "Flags" and often spoken of as "Fleur de Lis," popular herbaceous plants that come up year after year, and each season stronger and more floriferous than the previous. They grow in clumps and do well in almost any soil; are desirable in borders and shrubbery and are beautiful in beds and groups by themselves, and for planting along water edges. The flowers embrace a variety of colors and innumerable tints of blue, yellow and white. Those of the German forms are not so delicately colored, nor are they so large as the flowers of the Japanese varieties. They bloom the latter part of May and are through flowering the last of June, when the Japanese Iris are brilliant with their wealth of flowers. Both are needed to give a continuous effect from May to July.

German Iris (Iris Germanica)

In this species the inner segments of the flower are broad and stand upright, forming a beautifully crested flower instead of a flat, expanded one, as in the Japanese. The plants bloom in May and June, several or many flowers to a stem, much taller than the leaves, which are silvery-green and sword-shaped. They make beautiful veranda plants if lifted from the garden and placed in jardinières. Price, 10 cents each; $1.00 per dozen.

Japanese Iris

(Iris Kaempferi; Grandiflora)

These magnificent Iris are among the most beautiful of our summer flowering plants, and rival the orchids in their colorings. The prevailing colors are white, crimson, rose-jaic, lavender, violet and blue. Each flower usually contains several shades, while a golden-yellow blotch at the base of the petals intensifies the wealth of coloring. While the Iris succeeds in almost any soil and condition, it does best in a rich, deep, moist position. Price, double and single flowered, named varieties each, postpaid; ten distinct sorts for $2.00 by express.

Hardy Hibiscus (Mallows) (Dormant Roots) White and Pink

The flowers are immense in size. The color is of the purest white, with a large spot of deep velvety-crimson in the center of each flower. It will succeed anywhere and is perfectly hardy. Price, of good, strong roots, have bloomed this year, 15 cents each; three for 40 cents; large three-year-old plants, 25 cents each, $2.25 per dozen, by express only.

It is perfectly hardy, standing twenty degrees below zero. Price, nice young plants, strong and healthy, 35 cents each, or three for $1.00. Beautiful Hardy Ornamental Vines

Hardy English or Large-Flowered Clematis

NOTE—The Large-Flowered or Hardy English Clematis are considered the most beautiful of all our flowering Vines. The flowers are large, often measuring four to six inches across and are borne in great wreaths and clusters during July and August. The colors range from rich royal purple to pearly-white. The vines are of slender, wiry growth and require some support that they can twine around, like a rod, pole or wire, and if the location is somewhat moist and partially shaded, so much the better; the north side of the house or porch is often the best place for them; hardy, but a mulch of leaves or litter around the roots at least the first season, will be an advantage.

JACKMANI—The best known variety, with large violet-purple flowers, remarkable for their velvety richness. Price, 50 cents each.

HENRYI—Fine, large, creamy-white flowers; a strong grower and very hardy; one of the best of the white varieties. Price, 50 cents each.

DUCHESS OF EDINBURG—A free-flowering double white variety of medium-sized flower. Price, 50 cents each.

MADAME EDWARD ANDRE—This is the standard red Clematis, being the nearest approach to a scarlet yet produced. It is six-petaled and of the Jackmani type; very free-flowering and a strong, heavy grower. Price, 50 cents each.

Aristolochia Macropylla

(A. Sipho, Dutchman's Pipe.)

A grand hardy vine, producing a splendid dense shade. Grows in a wild state from Minnesota and Pennsylvania, southward to Kansas and Georgia. Leaves very large and broad, bright green. Flowers purple and yellow-green, solitary or two or three together, from the axis of the leaves, resembling a Dutch tobacco pipe. Price, strong plants, 40 cents each; $1.50 per dozen, by express.

Ampelopsis Veitchii

(Sometimes called "Boston Ivy" and "Japan Ivy")

Entirely hardy in the most exposed places, attaining a height of twenty to thirty feet in five or six years, growing on houses, brick or wood work with the greatest tenacity. It is a great protection to houses, as the leaves, lapping over each other like slates on a roof, effectually prevent rain from penetrating the walls. For covering dead trees, gateposts, boundary walls, etc., it has no equal. In the summer the foliage is a rich shade of green, but in the fall it assumes the most gorgeous tints of scarlet, crimson and orange. Truly a grand sight. Price, nice young plants, 15 cents each; $1.50 per dozen. Strong two-year-old plants, 25 cents each; $2.50 per dozen.

Akebia Quinata

A fast-growing, perfectly hardy and one of the most graceful hardy climbers with deep green foliage, produces in large clusters bunches of violet-brown flowers which have a pleasant cinnamon odor. Pipe for covering trellises and verandas. Price, 15 cents each; $1.25 per dozen.

Ampelopsis

Quinquefolia.

(Virginia Creeper.)

A high-climbing vine clinging to walls or branches of trees by tendrils of disc-bearing tendrils. Grows naturally from Quebec and Manitoba, southward to Florida and Texas. Leaves compound, consisting of five bright green toothed leaflets, fading in autumn with gorgeous tones of red and scarlet. Berries blue, produced in ample panicles. A handsome and graceful species. Price, strong plants, 25 cents each; $2.50 per dozen.

This elegant new Clematis is one of the finest climbing vines you can get. Flowers are rich creamy-white, and borne in beautiful clusters, completely covering the vine with beautiful star-shaped blossoms; exceedingly fragrant, the sweetest of all Clematis and one of the hardest and easiest to grow. Price, good strong plants, 15 cents each; two for 25 cents; $1.50 per dozen; two-year-old plants, 25 cents; three for 70 cents; $2.50 per dozen, postpaid; extra size, three-year-old vines, 35 cents; three for $1.00; $3.50 per dozen, by express.

The berries ripen in autumn and remain on the vine late into the winter. Price, 15 cents each; $1.50 per dozen.

WISTARIA—The Wistarias
Grand free-flowering vines with handsome showy flowers. They are among the best and hardiest of ornamental vines, and are well adapted for training on porches, arbors or trellises. For their best development a deep rich loamy soil should be provided by trenching and enriching, for they amply repay for any favors of this kind. When well established, a greater profusion of blossoms may be secured by rather severe pruning, cutting back the lateral shoots to short spurs, but the gain in flowers is perhaps at the sacrifice of picturesque and natural grace and beauty.

Wistaria Chinensis
Chinese Wistaria
A rapid growing tall vine with handsome foliage and flowers. Native of China. Leaves compound, consisting of about eleven pale green leaflets. Flowers pea-shaped, purplish, profusely borne in dense drooping clusters seven to twelve inches long, opening in mid-spring. Very showy and desirable. Price, 25 cents each; $2.50 per dozen.

Price, 10 cents each; three for 25 cents; $1.00 per dozen.

FRUIT TREES

The Fruit Trees offered are young and thrifty and will make very rapid growth and very quickly. Young Trees are not yet large enough to pay the bearers of the older ones. The smaller the tree, the more tender and more fibrous and bear transplanting better and are more apt to live, they can also be trimmed and shaped into any desired form and in the course of a few years will easily outstrip the older ones in growth.

If not prepared to plant your trees when received, "heeling in" by digging a trench deep enough to admit all of the roots and set the Trees therein, carefully packing the earth about the roots and take up when required. Remember not to leave the roots exposed to sun or air.

Dip the plants in water as soon as received, and bury the roots in moist, shady ground till you are ready to set them out. Neglect for an hour or so is often fatal.

**Catalpa Bungei and California Privet Hedge**
We have used the greatest care in obtaining our Flower Seed, and those we offer you are absolutely fresh, being grown under our personal supervision or imported from the best foreign seed growers. Failure in getting satisfactory results from seed planting may be attributed to the manner in which the seed is sown rather than the lack of germinating power in seed, and seedsmen are unjustly censured when the fault lies in the cultivator and not in the seed.

Sowing of Seeds—Score the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil.

For seeds that require an early start, toes curing blooms before frost, sow in shallow wooden boxes, in good garden soil. Cover seeds very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be taken in watering the seedlings well after planting and to protect from the sun for a few days with light paper.

Flowers from seed are usually known as annuals, biennials and perennials.

Annuals bloom and ripen seed the first year, and then perish.

Biennials do not generally flower the first year, and are in perfection only one year.

Perennials continue to flower several years in succession. Many of them bloom the first year if sown early.

NOVELTIES AND SPECIALTIES FOR 1909

TWO NEW GIANT CYCLAMEN

Emperor William

A magnificent large flower of brilliant carmine-red, having broad curled petals. A splendid variety both in flower and foliage. The leaves are very large and waxy, beautifully mottled in several shades of gray, green and silver. Price, 15 cents per packet of 25 seeds.

Margaret

A fine, large flower of purest whiteness with an eye of brilliant crimson-like. The waxy whiteness of the broad curled petals make a handsome flower. Price, 15 cents per packet of 25 seeds.

FOR NOVELTIES IN NASTURTIUMS SEE PAGES 97 AND 98.

New Annual Chrysanthemum, "Bridal Robe."

Of very compact and upright habit, and not exceeding ten inches in height, the sturdy plants throw out their finely feathered foliage from the base and deck themselves with a mantle of extra-doubles pure white flowers. Flowers are like large double Daisies and are massed on the plants, fine for cut flowers. One of the best bedding plants yet introduced. Price, 10 cents per packet.

For Novelties in Sweet Peas
See Pages 102 and 103.

FOR NOVELTIES IN NASTURTIUMS SEE PAGES 97 AND 98.

Forget-Me-Not (Myosotis) Ruth Fisher

New Forget-Me-Not (Myosotis) Ruth Fisher

This fine new Forget-Me-Not which took first prizes in all the flower shows of Europe last year, is a neat, compact plant with large sprays of bright light-blue flowers mixed strongly above glossy dark green foliage. The flower sprays are the largest ever known in Forget-Me-Not, and the color the truest blue. Extremely hardy and will stand the coldest climate. Price, 20 cents per packet.

New Dwarf Nasturtium

Burpee’s “Golden-Midnight”

One of the most beautiful novelties yet introduced. Fine compact plants blooming profusely from early summer until late frost. From an artistic point of view, the contrast between the clear golden-yellow foliage and extremely dark flowers is most remarkable. The foliage is lighter yellow than either Cloth of Gold or Golden Queen, while the flowers are such intensely deep maroon as to seem almost black—hence the name “Golden-Midnight.” (See illustration page 97.) Price, 15 cents per packet.

Chrysanthemum “Bridal Robe.”

New Giant Cyclamen “Margaret”
FLOWER SEED NOVELTIES AND SPECIALTIES

Beautiful New Violet, "Peacock"

This is distinctly new, very different from any violet yet introduced. It is a large full flower, as large as a small Pansy, borne on long stems high above glossy dark green leaves. In color it is white shading to palest lavender in the center, the whole flower stiped with hair lines of brilliant blue radiating from the center. The plants are literally a mass of flowers. Price, 10 cents per packet.

A New Strain of Giant Pansies, "English Prize"

The Pansy is continually being improved, and English, German and French seedsmen are constantly vying with each other to produce the finest. This mixture is saved from the finest prize collection of Pansies in England, and the seed is saved direct from prize plants. The size of flowers and brilliance of coloring cannot be described. None are finer. Price, 25 cents per packet.

Two Fine New Pansies Andromeda

One of the largest flowered and most distinct Pansies yet introduced. A dainty flower of delicate apple blossoms, with tints of darker pink and lavender. Exquisite coloring and beautifully waved petals. Price, 20 cents per packet.

Prince Henry

This is the largest flowered dark Pansy ever offered. The flowers are immense and of great substance. The color one that is always popular, a rich and very dark blue of velvety appearance. Very handsome, Price, 20 cents per packet.

The Chinese Kudzu Vine, "Jack-and-the-Beanstalk"

If you wish a vine that will grow everywhere, plant the Chinese Kudzu. It will flourish where nothing else grow, and will last for many years. The large, bold leaves of the brightest green afford a dense shade. It is of wonderfully strong growth, which makes it invaluable for rapidly covering arbors, fences, porches, dead or old trees, rockeries, etc. The Kudzu Vine is a native of China, where it is grown not only for the beauty of the plant, but also for the edible value of its roots.
